## Skills

---

- Ruby / Ruby on rails
- PostgreSQL / MongoDB / Sqlite3 / Django
- Git / GitHub
- GitLab
- Postman
- HTML/CSS
- JavaScript/JQuery/AjaX
- Bootstrap5
- Jira
- Payment Gateways

## Projects

---

- **Skills In Cloud**

Developed and implemented LTI 1.3 integration in an LMS to enable secure access to lecture content. Utilized OmniAuth and JSON Web Token (JWT) for user authentication. Designed and implemented a database solution to track user activity, including lecture entry and exit times. Developed an API for exporting user engagement data in CSV format, providing insights into lecture attendance and duration.

- **BC For Guy**

Developed and maintained a web application to manage properties, tenants, work orders, and vendors. The platform enables landlords to track properties, rent payments, and assign maintenance tasks to vendors. Tenants can pay rent online and request maintenance services. Vendors receive and update the status of work orders. The system also integrates payment gateways for secure transactions and utilizes background processing for notifications and job management.

- **Dahlia Dating App**

As a Backend Expert, I developed and optimized algorithms to match users based on their interests, compatibility, and location. I built and maintained a real-time messaging system for users to connect after being matched. Additionally, I integrated personality-based questionnaires to refine match accuracy and enhance user interactions.

- **BTH**

As a Project Manager, I led a project focused on developing an e-commerce platform for selling gardening products like planters and plants. My role involved overseeing task completion, assigning tasks to developers, and ensuring project timelines were met. I also coordinated the creation of demo videos to showcase progress and features to clients, ensuring clear communication and alignment with client expectations.

- **Growmark-TankSpotter**

This project focused on managing propane and oil deliveries, enabling efficient order processing, delivery tracking, and customer communication. Key features included email notifications, an admin panel for managing deliveries, and real-time updates to ensure a smooth user experience.
